Stampin' Up Supplies:

STAMPS – Gone Fishing Photopolymer Stamp Set

PAPER

- Misty Moonlight Cardstock
- Retired Let's Go Fishing Designer Series Paper (DSP)
- Basic White Cardstock for front piece and Inside card layer
- Pecan Pie Cardstock
- Basic White Medium Envelope

INK – Misty Moonlight Ink

DIES – Deckled Rectangles (3rd and 4th size)

EMBELLISHMENTS – your choice of whatever you have that would look like air bubbles coming from the fish

TOOLS – Paper Trimmer, Clear Stamp blocks, Stampin' Bone Folder, Cut & Emboss Machine, Tombow Liquid Multipurpose Glue, Seal Adhesive, Mini Dimensionals, Take Your Pick Tool, Paper Snips, Simply Shammy

Measurements:

- 4 ¼" x 11" Misty Moonlight Card Base, score on the long side at 1 ¼" and 5 ½"
- 4" x 8" Let's Go Fishing DSP, folded in half at 4" to create a square
- 1" x 4" Let's Go Fishing DSP of fly-fishing hooks (2 pieces)
- 2" x 3 1/2" Basic White tag layer
- 2" x 3 1/2" Pecan Pie tag layer
- 4" square Basic White for inner layer
- 2 ¼" x 6" your choice of DSP for envelope flap

Instructions:

- Prior to building the card, fussy cut out 3 DSP fish that match the card example.
- Prepare Misty Moonlight card base and score.
- Adhere the 1" x 4" fly-fishing hooks DSP pieces as shown in photo.
- With the 4" x 8" piece of DSP folded into a square, place adhesive to close the 3 open sides. Close the card base. Slide the DSP square under the front narrow flap so the folded edge aligns with the other scored card edge, allowing for a 1/8" margin both top and bottom. While holding the DSP square in place, carefully flip open the 1 1/4" section and apply adhesive only 1" wide from the outer edge of the flap. Fold back down to attach the DSP. The goal is for the entire card to be able to open flat to a length of approximately 14".
- With Misty Moonlight ink, stamp the inner Basic White square with the greeting and two lures as shown. Adhere to inside of card.
- With Misty Moonlight ink stamp the front greeting on the narrow Basic White piece. Run both Basic White and Pecan Pie pieces using the Deckled Rectangle Dies through Cut and Emboss Machine. Adhere those two layers together.
- The front finished tag will be adhered to the front of the card at a diagonal, so be careful not to use too much adhesive.
- With Mini Dimensionals Adhere the fussy cut fish as shown on card front.
- Add the embellishment of your choice to create air bubbles going up from the fish.
- Adhere and trim the 2 1/4" x 6" DSP piece to envelope flap.
